

HOW FASTRENT WORKS

If you reside in Italy, you can use the FastRent service straight away. All you need is to be registered with **Maggiore Club** Gold or Platinum and have a registered credit card.

To make an instant rental car booking, you need to go to your reserved page, inserting the username and **password** you chose during the Club registration phase.

The system will recognize you automatically and it will apply the pricing conditions reserved for you and directly credit you with the miles you have accumulated, if you have also registered your MilleMiglia card number.

After every booking, you will receive an email with your rental letter attached to it and a text message with the vehicle license plate number, date, time and pick-up agency. Here, only for your first FastRent rental, we will ask you to endorse the information you provided during the registration phase.

For subsequent rentals, after each booking, simply to go to the FastRent Point, to collect your rental letter, which is already ready, and the keys to your Maggiore car.

Without any waiting, you will be ready to go!
