

Winter tyres for maximum safety.

Whichever road you decide to take, we want to ensure your maximum safety at all times when you are on board a Maggiore car. For this reason, we make winter tyres available to our travellers: These are suitable for driving on particularly cold, snowy or muddy surfaces because they retain a better grip than a normal tyre. Main features: soft compound – quick to reach operating temperature – tread containing sipes for maximum grip – usable in place of snow chains when these are mandatory.
